

# introduction

The Software to be tested is located at:

<https://github.com/CMPUT301F19T04/moo-d>

This software project (moo-d) is a mood tracking android app. Think of twitter, but its focused on emotions. Nothing to do with cows, the project name is a system-d pun.

Tests will be written with JUnit and some UI test platform such as Espresso.

# anticipated testing activities

White box analysis of Android activity flow

Black box testing of FireBase backend

Misc. JUnit testing of applicable classes

# Group project Members (And roles)

- Alex Rostron (Software tester, proposal submitter)
- Jacob Reckhard (Software tester, proposed this project)
- Arun Woosaree (Software tester, The automater)
